

# ELBOWS

## SPECIFIC POINTS

### LI-10

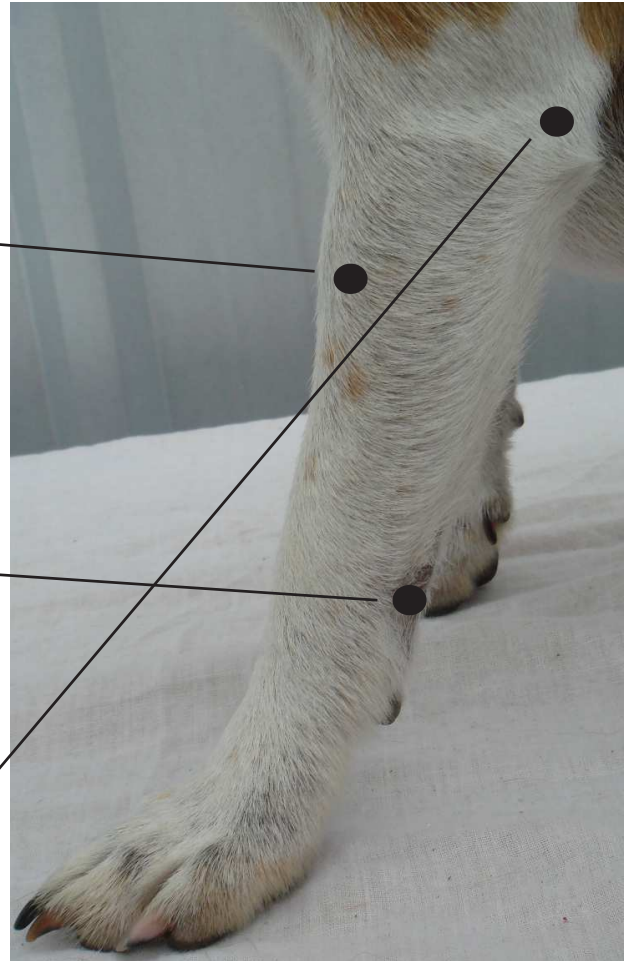

Large Intestine 10 is on the anterior lateral surface of the upper forelimb, one rib width below Large Intestine 11 (the standard point in the elbow crease).

### TH-5

Triple Heater 5 is two rib widths above the wrist, in a deep depression on the dog's leg, on the lateral posterior surface, opposite Pericardium 6.

### TH-10

When the elbow is flexed, Triple Heater 10 is in a depression, above and behind the elbow.

**LU-5**

Lung 5 is in a depression at the front of the elbow, lateral to the biceps tendon.

**PC-3**

Pericardium 3 is in a depression at the front of the elbow on the medial side of the biceps tendon.

**HE-3**

Heart 3 is at the medial end of the elbow crease, in front of the joint.
